

# OWICK KURB®

**SOLID QUALITY & PROVEN DURABILITY**

# SEPARATOR CURB

Each pallet holds 211 lf of Separator. Each Separator Unit weighs over 34 lbs. A conveyor can be hooked to a truck for long lengths of Separator. Using our "Hook & Bolt System" you can install nearly 1000 ft. per hour at temporary installations.

Q 640  
Marker Puller

For permanent installations a hole is drilled into the road surface and the Separator is secured to the road using a bolt and molly. Tighten to the road until the washer begins to bend. Our curb doesn't crack or shatter. Reboundable markers slide into place quickly with the panel puller. Spacing of markers is as close as every meter.

**THE ONE AND ONLY WITH OVER 20 YEARS ROAD EXPERIENCE**

# BIG BOLLARD™

High Target Value + Clear Visibility = Motorist Respect

The BIG BOLLARD™ is the largest reboundable bollard on the market with a 15" circumference. The rubber flex allows the BIG BOLLARD to rebound on impact. BIG BOLLARD achieves the traffic engineer's requirement for motorist compliance when narrow posts won't.

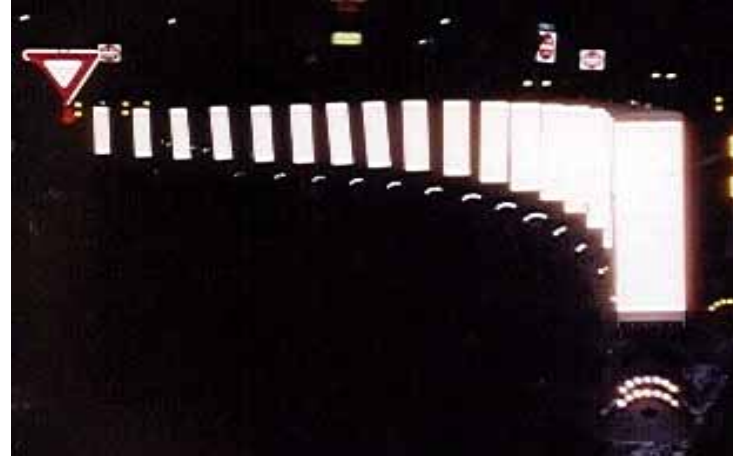

Also available in 36" height.

**NARROW FEEBLE POST DON'T WORK ! - use BIG BOLLARD™**

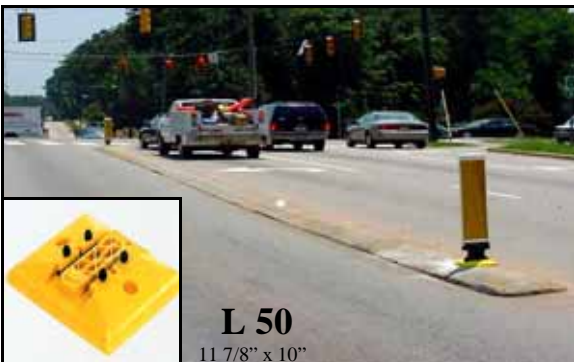

# L104 MEGA MARKER™

**CLEAR - DAY & NIGHT**

**CROSSWALK MESSAGE**

**BULLNOSE VISIBILITY**

The Air Marker offers high target value both day and night. Each side of the Air Marker has 232 square inches of Hi-Intensity retro-reflective sheeting.

**GET THE MESSAGE ACROSS WITH MEGA MARKERS**

# RAILROAD SAFETY

Proclaimed the least expensive safety measure to significantly improve grade crossing safety. QWICK KURB® is the only median separator system that has been involved in a FRA sponsored test. Proven to reduce motorist drive arounds over 75%. Combination of formidable markers and raised mountable separator deters drive-arounds, and still allows emergency vehicles a way out. Average installation time per crossing is just three hours. The raised separator is the most cost efficient Supplemental Safety Measure available for proposed Quiet Zones.

**THE ONLY SYSTEM SPONSORED FOR TEST BY STATE & FRA**

# Median

# Edgeline

# Interstate

# Roundabout

# THE ONE AND ONLY LANE SHIFTING CONVEYOR

Nightly lane closures, daily shifts of HOV lanes. The conveyor picks up the curb and transfers it up to 20 feet laterally. Conveyor attaches to a standard one ton Truck. Separator is moved at up to 4 miles per hour with a two-man crew. Separator system gives superior visual guidance in comparison to barrier wall.

**Movin' on Over**

**THE ONLY AUTOMATED LANE SHIFT SYSTEM**

# WORK ZONE AHEAD

## SUPERIOR WET NIGHT REFLECTIVITY

Each piece of separator securely joins to the next using a metal hook and tongue system. *It is not necessary to fasten the system to the road way.*

It is quick to install and relocate and it is easy to store for the next job. Curb weights about 10 lb per foot.

Bright profile reflective arcs significantly reduce the need for any temporary traffic markings.

Markers clearly guide motorist through work zones. Markers rebound on impact without dislodging separator.

**INSTALL UP TO 1000 LF PER HOUR WITH A 4 MAN CREW**

# CONCRETE CURB STRONG

Install Replacement Marker On Existing Rubber Flex in a Minute!

**SAVE MAINTENANCE MONEY WITH OUR 2 PART MARKER**

# Some claim they are "Equal". They are not!

## Roadway Traffic Hazard Warranty - 5 Years

Separator, Reflective Arcs and Asphalt Mollies

For fixed installations of products at specified areas, QWICK KURB®, INC. (hereinafter QWICK KURB®) provides a comprehensive Warranty for Product Performance (that is, the covered products will maintain their functionality) to the original purchaser for a period of five (5) years. Subject to limitations stated herein, the Warranty covers listed products rendered non-functional *even if caused by normal vehicular roadway traffic*. A separate Warranty may cover damage from snowplows. This Warranty does not apply to a competitive bid project unless the conditions of the bid require the Warranty of all bidders.

### SPECIFIED LOCATION

This Warranty applies to units on fixed installations, and is effective provided that QWICK KURB® gives specific written coverage identifying the installation by location. To avail itself of this Warranty, the purchaser must, before purchase is made, supply QWICK KURB® with a detailed drawing of the traffic design and specific location of the intended installation, and receive this Warranty with that location identified below and with the specific signature from QWICK KURB® that the Warranty is approved. The Warranty in no way implies approval or an opinion of the suitability or configuration of the installation or behavior of traffic at the location; the Warranty is confined strictly to covered products. Units at the installation identified below are approved under this Warranty. NOTE: it is not necessary for experienced users under annual contracts to identify projects.

In the lines above, describe the location and installation in detail (state, county, city, road name, and position on the road).

**COVERED PRODUCTS:** The products covered by this Performance Warranty are new QWICK KURB® units as follows: L60 KURB; L61 and L62 END KURB; L65 Reflective Arc™; S65 Securing Arc and FS50 Cloverleaf Molly for asphalt.

**TERM:** The five (5) year term of this Warranty extends from the date product was shipped to the initially registered purchaser including such purchaser whose purchase is made through an authorized QWICK KURB® dealer or distributor.

### REPLACEMENT OR REPAIR

During the Warranty period, the obligation of QWICK KURB® is limited to repairing or replacing, as QWICK KURB® shall elect, any covered unit. Purchaser shall give QWICK KURB® reasonable opportunity to examine the installed, non-functional units on site, unless Purchaser determines that non-functional units need to be removed immediately for safety reasons. In this exception Purchaser shall document promptly in written form a description of the product failure to include if possible photographs of the non-functional units while still installed, and Purchaser will store such products for examination by QWICK KURB®.

### REPLACEMENT SCHEDULE

QWICK KURB® will replace or repair non-functional units by granting price credits against current prices as follows: through first two years 100%, i. e., free of charge; third year through fifth year 60%.

### WHAT IS NOT COVERED

This Warranty does not cover units moved to a location different than the original installation; storage, shipment, removal, maintenance or installation done in a manner inconsistent with the instructions in the QWICK KURB® Installation Manual(s), including use of anchoring devices other than those QWICK KURB® supplies unless pre-approved in writing by QWICK KURB®; color fading; modifications to the units not performed by authorized QWICK KURB® technical personnel; damage from but not limited to metal-tracked equipment, chemical or other spills, vandalism, acts of God, etc.; units where QWICK KURB® vertical markers are used at intervals greater than seven meters; vertical markers and flexes.

Except as described herein, QWICK KURB® makes no express or implied Warranty whatsoever with respect to product maintenance or suitability of installation. QWICK KURB® disclaims any liability for incidental, or consequential damages to the extent permitted by law. The customer remedies described herein shall be exclusive of any other remedies. The Warranties described herein are for the exclusive benefit of the initially registered purchaser, and are not assignable except as provided otherwise (sales through dealers may be assignable at locations specified above).

Warranty approved by \_\_\_\_\_, 200\_\_\_\_

President or Plant Manager

## Workmanship and Materials Warranty - 2 Years

All units

QWICK KURB®, INC. ("QWICK KURB") warrants each new unit to be free from defects in workmanship and material for a period of two (2) years for fixed installations from the date of shipment to the initially registered purchaser.

During this warranty period, the obligation of QWICK KURB is limited to repairing or replacing, as QWICK KURB may elect, any part or parts of such product determined to be defective in material and/or workmanship.

This warranty does not extend to any unit which has been relocated to an installation away from its original installation, which has been subjected to abuse, misuse, improper installation, which has been inadequately maintained or stored, or which has been modified by anyone other than QWICK KURB factory or authorized warranty service personnel.

This warranty does not cover travel expenses, the cost of specialized equipment for gaining access to the product, or labor charges for removal, handling or re-installation of the product.

THERE ARE NO OTHER WARRANTEES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT, SHALL QWICK KURB BE LIABLE FOR ANY LOSS OF PROFITS OR ANY INDIRECT OR CONSEQUENTIAL DAMAGES ARISING OUT OF ANY SUCH DEFECT IN MATERIAL OR WORKMANSHIP.

## JUST SO YOU KNOW!

The original German version of the system, Klemmfix, has been used on the Autobahn since the mid-1980s.

In 1995 QWICK KURB® began operating in the United States. These raised separator systems are installed worldwide, making them subject to countless vehicle impacts in all weather conditions and climates, from the frigid winter winds in Michigan and Canada to the hot summer desert air of New Mexico. So we know that our product holds up, and we know that it holds up well.
