

BULLNOSE MARKER

MARK HAZARDS SECURELY IN TEMPORARY OR PERMANENT APPLICATIONS

The QWICK KURB® Bullnose Marker is engineered to attach high-visibility QWICK KURB Panel Markers in stand alone configurations to mark concrete medians and crosswalks as well as other hazards on roads and in parking lots.

The Panel Marker integrates into the base using the unique QWICK KURB vertical rebounding flex boot support. This allows for installation of extra large markers that can spring back to an upright position after an impact.

The Bullnose Marker will out perform standard markers and channellizers in virtually every condition. Customized reflective sheeting symbols are also available.
